"Hamlet" Travels To Great Britain

The Indiana Central College Players are participating in the American Theater Festival in Great Britain by the production of "Hamlet" this summer in the land where William Shakespeare wrote his tragedy.

This was announced today by Richard E. Schuster, director of the play and assistant professor of speech, and Dr. George E. Sease, president of Indiana Central College.

The troupe will present "Hamlet" in Northern England and the British Isles and will return to the United States in late September.

Four members of the troupe will travel to the United States and will return to the United States to perform "Hamlet" in the American Theater Festival. The actors will use the same costumes that were used in the production of "Hamlet" in Great Britain.

Dr. Sease said, "The production of "Hamlet" is a significant event for Indiana Central and will be a valuable educational experience for the students involved."
In the recent sensitivity training or T-Group sessions, held March 2 through March 4, approximately 100 students and faculty members participated. This was twice as many people as in any of the past workshops that had been anticipated. There were six sessions held, including the chapel session.

In the chapel session, March 4, a discussion was opened concerning the benefit of all of the students. Besides Dr. Austin Parker and Dr. Drupin, all other people in the room turned up and, according to these speakers, it is because we do not trust people enough. This was also the theme of a paper given by Dr. Vicki Lucking. Also, everyone extending chapel part in the to "Get Involved." The only people that do not come to the spirit of the paper are: PROFESSOR CAROL CHAMBERS, who met with the exception of Vicki Lucking and Dr. Chambers, who met with the exception of Vicki Lucking and Dr. Chambers, who met with the exception of Vicki Lucking and Dr. Chambers, who met with the exception of Vicki Lucking.

Although Dr. Parker may have "The Sensitivity Training Groups," in the chapel session Monday, most of those who attended the session stayed behind. However, in the small groups, he came across very well.

The aforementioned chapel group, with the exception of Vicki Lucking and Dr. Chambers, who met with the exception of Vicki Lucking and Dr. Chambers, who met with the exception of Vicki Lucking and Dr. Chambers, who met with the exception of Vicki Lucking.

(1) One or two more T-Group sessions with college leadership, which would have been a total of 15 people, but that included only 5-6 people, I had two very interesting sessions.

(2) Dr. Parker and Dr. Drupin always open the discussion of the chapel session.

(3) More T-Group sessions, all with outside leadership; Dr. Chambers, whose name was not included in the discussion.

Indicated there may be a positive influence from something that Dr. Parker and Dr. Drupin back to ICC this spring for more sessions.

"Sensitivity Training" Groups 
Student Participant Reaction

I was asked to rate my feelings on the recent sensitivity training sessions. I find this very hard to do for two reasons. First, because I know of no way to describe the feelings one gets when one gets inside himself, and, second, I believe the experience, not one that is easy to compare to one of the experiences of the following sessions. I can understand and agree with others.

I have received many comments on some good, some bad, and some very good on these experiences. As a whole, I think that they wish that they had taken part and wish to do so in the future.

The negative remarks were helpful; also, everyone is not receptive to everything. But those who did not feel they benefited from the remarks only conveyed that they would give it a try in the future.

The remarks that worried me were those indicating the individual that they would not allow themselves to be involved in such an experience. I wonder what is inside of those people that they are so afraid of. I wonder why they are so distrustful of others and especially of themselves. I know they have just reason for feeling as they do, but it is hard for me to understand and reason those.

As far as my own feelings on the experience, it was a very happy day, and, I believe, was sometimes quite scary. It, by no means, is a cureall for all of the world's problems, but it helps you prepare for those problems, that are meant to be introduced to a permanent, a lasting, and eternally changing world. It helps you to get over "Iowes" and, to a degree, to appreciate one's own self. I can even come close to determining how one feels, understanding the awareness of the session -- "Get Involved." The only person in your way is you.

LETTER TO EDITOR

After Vietnam, government, and, equally, the main "cause" among college students is the food in the dormitories.

"In the past, countless grievances were lodged in the college dining halls. Students and College Presidents’ offices express the "unbearable and needlessly displaced, disgusting" daily for the price of a se-

The college freshman, coming to the campus dining hall straight from the bowels of home, still retaining good table manners, under mother's table where his picky taste buds have been catered to, finds the new fare of a college halls as a meal ticket. A typical 40 cents meal ticket for the next four years of his life, he is to be forced to balance the baloney, and most times, tasty meals of the college food service, eggs canned from home, late night cooking sessions in his college residence halls, and the milk shakes, french fries, and hamburgers purchased for him, he sometimes manages to survive, and in most cases, he grows taller, and stronger, and wider.

A standard editorial of college newspapers concerning the "inexpensive food in the cafeteria." Stu-

...tudent shows a great deal of compassion, if not love, for the food service. If one prides himself on the at least cost of food, he may feel a feeling of indifference to the needs of the customer.

Whatever, no matter how wide the chasm, how economical the food that is provided, even the best food can seem cold and dull if there exists a feeling of indifference to the needs of the customer.

I also have a very great prejudice against this type of food. I usually have three entrees, one or two vegetables, and a dessert, which is usually not at all different selections, and in many classes of meals.

Many members of the college faculty and staff, delighted with such prices at an average cost of .74.

"Sensitivity Training" Groups 
Faculty Non-Participant Reaction

PROFESSOR CAROL SUE RAY was represented by Dr. Lucking. In general, the advantages of the T-Group sessions are: increased awareness of self, trend toward honesty, sensitivity to others' feelings and needs. The disadvantages might be a feeling of unity that is so strong it excludes those outside the group.

My own reactions to the sessions were positive. I got to know people much better than I would have if we just sat and talked about them. During the sessions I felt that I was treated as a person, not just as a teacher.

One thing that bothered me about these sessions is: honesty; a feeling of spiritliness; high; emphasis on love; support; caring.

I would be in favor of more T-Group sessions for both faculty and students since I feel a greater benefit would be derived if both groups were involved. I think people often react to these groups not as they are but as the labels we give them. Labels mean nothing; they are just a way of thinking about, describing, and expressing who they are, rather than enhanced. I am not sure that this is the case in sensitivity training as it occurred in the chapel session. It was the case that for persons who have not progressed very far in religious maturity, learning to relate to others in an elementary way is necessary and can be very positive. They were asking the students what they thought about the training. So sensitivity training may be utilized for achieving religious maturity. This could not be a very intrinsic religiously.

Central Seniors

Receive Purdue Science Grants

Indiana Central College seniors have been notified of their admission to the Purdue University Science Correspondence Study in the department of geoscience.

J. W. Green will work toward a master of science degree in atmospheric science. The physics major was awarded a National Air Pollution Control Administration fellowship for a choice of offer, which provides $2,500 a calendar year, full tuition and fees. His studies will concern the role of meteorological processes in the control of atmos-

Joseph L. Goss, a mathematics major, was awarded a halftime teaching assistantship in meteorology, which provides $2,500 a calendar year with a stipend of tuition and fees. His studies will concern the role of meteorological processes in the control of atmos-

Green is a graduate of Canton High School. Goss lives at 4133 Alpine Ave. in West Lafayette. He is the son of Mr. and Mrs. John Goss. His father is a psychologist.

M. Chambers
Future Centralite Receives Methodist Scholarship

Martha Sue Small, who will graduate this spring from high school, Elletsville, Ind., has been approved for a 1970-71 United Methodist scholarship at Indiana Central College. Miss Small’s parents are Mr. and Mrs. Charles C. Small.

The United Methodist scholarship award covers tuition and fees up to $500 a year and is granted on the basis of superior academic standing, leadership ability, active churchmanship, character, personality, and need.

About 200 cash awards are made annually. All are made in honor of the United Methodist Church in its national scholarship program which has been in operation since 1939. The United Methodist Church Board of Education is the governing body of the scholarship program. The scholarships are made available through contributions from United Methodist churches and individuals. Funds for the support of the U.M. scholarships are received from local churches on the basis of a nomination-only basis without offering United Methodist Church{}

Central Grads Named Men Of The Year

Seven seniors at Indiana Central College will be listed in the 1970 Outstanding Young Men of America. The men the choice will be between 21 and 35 years old and will receive the award for their services to others, professional excellence, business advancement, teaching skills and civic and professional recognition.

Those listed are:

William C. Green, ’60, teacher at Indianapolis Technical School, Indianapolis.

Edgar J. Huffman, ’53, associate professor of mathematics at Butler University, Indianapolis.

Brian J. Kowal, ’60, assistant professor of computer science, Indiana University, Bloomington.

Eugene W. Luchten, ’60, administrator of the United Methodist Church, Indianapolis.

Anus M.noch, ’59, a basketball player at Iroo University, Bloomington.

Students To Elect New Central Council

This Friday marks the election of new officers for next year’s Central Council. Present officers: Mike Cecil, Bonnie Minster, Tom Wilson, and Mark Miller have contributed very much to the growth and change of Central during the past year. Presidential candidates are:

E. Inman Henry, ’63, assistant director of purchasing and procurement, Deaconess Hospital, Evansville, Ind.

Central’s “Antigon” Is “Greek Way Of Life”

Sophocles' tragedy "Antigon" will be the final presentation this season of the Indiana Central College Players. It will be on the Ransburg Auditorium stage at night of April. A group of students and teachers who have been working on the play for months now will be giving the presentation. The play will be performed on April 28. The box office will be open from 8 a.m. to 8 p.m. on school days. On the evenings of the performance it will be open until certain time.

Eleven Returning Lettermen Head Coach Bright's Squad

Winter is finally leaving us and in comes spring baseball and spring field hockey. For Indiana Central’s diamond, and red, the pitchers will be starting the mound and rounding third some in last year’s action. SPORTS

SPEAKING OF SPORTS by Carl Herbst

This issue I would like to take you through the life of a typical basketball player. How does he do this? Because of the recent pro beginnings of the big names. A story of a player, the millions which most of us would give to have half of. He's talking about basketball right now since it is current with the drafting, but any player has to worry about any pro sport. So let's take a look at the life of a basketball star as I see it.

The first thing in a star's life is his birth which is usually common to man human beings. It's a boy (previously so) the first thing he receives is a basketball. He learns to love this ball and wants it at his side all the time. Sort of a new best friend.

During his first few months and years of the star his life gets the feel of a basketball. He first starts out by rolling it around but soon he's able to pick it up. As soon as his parents notice him picking up the ball he receives a rim as a toy and before you know it they are in the back yard with this ground, but it is raised a foot a year until it reaches the acceptable height.

Now it's time for the future star to find out what he can do with the ball. This takes a little time for him to master but before too long he can manage to move the ball from hand to hand without much trouble.

Every second grade the athletic teams are written at the start of the season in which the team members of the district are chosen. A lot of times, some of the kids are chosen from the first graders. With many hours of shooting the ball on a few teams and does very well. He will build up his points a game, but at least ten.

During high school he starts to do things that are a little more difficult. He dribbles, shoots, passes, and wins in fine style and passes through the end of his sophomore year. During his junior and senior years he really starts to take a liking to the floor and off in the classroom. All the time he keeps shoothing and working hard on fundamentals. Of course the star gets a full ride to college and is a great player there. He gets national recognition for all his hard work many times. He is praised by many and talked about by all. He is then at the height of his star.

Now he's getting out of college going to practice with his minorная. This is where we begin and where he will end.

The star has worked all his life to be as good as he is. He has worked with the men that really count. A ball player can't be great by himself. He has to live a life to be proud of and one that is not only for himself but for a God. He owes his life to others and to God. Don't we all?

WOMEN'S SPORTS

Barnett

Volleyball Intramurals for Women

During the past four weeks the members of the Indiana State, Purdue, Earlham, Anderson, and Franklin to bring the first place award to the Central campus. They played in participating in volleyball intramurals, and the women have been great. There are two teams that are undefeated and the game seems to be tight for first place between four teams. There are over sixty women involved in the Central campus and thirty in the Purdue team.

The intramural program started in April. The team has a home game at 7:30 p.m. every Thursday in the gymnasium. The first team to score twenty-five points wins.

This week's game is against Barnard.
