"Flowers for Algernon," now showing!

The theatre department of Indiana Central University began its 1980-81 season with the play Flowers for Algernon by D. B. Selden. It will be held Friday, October 10 at 8:00 P.M., and Sunday, October 12 at 3:00 P.M., in Ransburg Auditorium.

This contemporary drama is the story of Charlie Gordon (Brian Cummings), a willing victim of a strange scientific experiment—to raise his I.Q. from 68 to 185 through the chemical injection of enzyns. The process was performed successfully by Dr. Strauss (Gary Marks) and Professor Nemur (Kevin Ryan) on a laboratory mouse, Algernon, but Charlie is the first human volunteer.

The 24-member cast includes: Kathryn Williams as Alice Kinnian, Charlie's teacher and friend; Mike Marr as Burt Seldon, a lab technician who is working on his Ph.D. thesis; and Marianne Holdzkom as Mrs. Donner, a motherly woman who employs Charlie in her bakery. Chris Ribble and Michael Klass play Charlie's parents, while Tammy Parsons is his sister, Norma.

Others in the cast are Debbie Scott as Doris, Dennis Seuder as Frank, Bonnie Cutter as Gina and James Simone as Joe.

The cast, which was open to the faculty, staff and students, includes Angela Mouser as Ellen, Sheila Brody as Brenda, Amy Regenbarger as Connie, Laura Mouser as Young Norma and Becky Wykes (“who works” in Central’s Placement Office) as the Chairlady, Bonnie Williams as Mrs. Mooney, Debra Mackey as Mrs. Nemur, Arthur Davis as Mr. Harvey, Cynthia Hill as Jackie Welburg and Leslie McClung as Anne Welburg.

Radio station WICR destroyed

By Tim Davis

Indiana Central’s radio station, WICR-FM (88.7 on your dial), blew up yesterday in an unexplained freak accident. Jerry Gelpeky, working in the station at the time of the blast, explained that he wasn’t too happy about absorbing most of the shock of the explosion, and then passed out.

Witnesses have stated that the sky was darkened by the explosion of massive amounts of black vinyl. Police are still investigating.

If you think that this is something to be concerned about, or that this is something that might become a daily occurrence, don’t worry. This kind of thing will probably only happen once or twice every month. One thing that is a daily occurrence is music and sports on WICR.

WICR is broadcasting from 8AM-12PM on weekdays, and from 12 noon until 12 midnight on Saturdays and Sundays. Thirty DJ’s are working to give students a good time, including rock and roll music and various sports events such as home football games along with all home basketball games.

Besides student DJ’s there are students who help keep WICR on the air. Jay Cole is the station manager, and has a number of responsibilities. Most important among them is making sure that DJ’s are assigned to time slots and that they fulfill their assignments. Ben Arndt is the assistant manager. Mark Marks is the music director at WICR. His main tasks are selecting and ordering of the records that will be played.

Music, sports, a staff of student DJ’s and managers all go together to make WICR something worth listening to. So, when you’ve got the time, listen to WICR. It won’t blow up.

Letters to the student body

To the student body of Indiana Central University:

Greetings!

Welcome back to school. Along with everyone else, I hope you all had an action-packed, fun-filled, enlightening summer.

Most of you don’t know me. Some of you will never know me. Let me introduce myself. I am STUDENT—perennial if you prefer.

I took a break from Indiana Central two years ago to see the world and seek my fortune. In simpler terms, I left the B.S. (and I don’t mean Bachelor of Science) behind to see what the world is really like. I took advantage of my vacation to attempt to raise the fortune I need to attend this fine institution.

I use the term “fine institution” with all sincerity, although you probably read it with the proverbial tongue in cheek. Why did you do that?

Despite the foofaraw and extreme pompousness of this right-wing institution, it is a good place. Consider the knowledge that is available to you if you only decide that KNOWLEDGE IS GOOD. The collected knowledge in the minds of our instructors and professors alone is staggering.

Incidentally, don’t wait for instructors and professors to tell you what they know. That is what they are paid for. But unfortunately there are a few of them that couldn’t teach their way out of a paper classroom. If you ask them about the things you WANT to know . . . Think of what you’ll learn.

School can be a drag. School can also be a lot of fun. Ah! That’s the part that those of you in the disco generation will feel free to share any important ideas, events or opinions.

If you need to announce news, please submit it at least two and a half weeks in advance.

I hope we of the Reflector can present all perspectives on issues on campus. This means perspectives of resident students, commuters, part-time students and the faculty. The ones who will give these perspectives is you—the student body and faculty. I wish you all a great year.

—Thank you,
Diane Parmeter Co-editor, Reflector 1980

Big Brothers, Inc. of Metro Indianapolis is starting a Big Brothers Club on campus. There have been ICU students in the past who have volunteered, but the plans this year are to serve the needs of the children in the nearby area by recruiting members for the Big Brothers Club. Each volunteer member would be “matched” to a child, on a one-to-one basis, who has no father to see him.

I will be the club sponsor and each member will also be officially sanctioned by the Big Brother Standards Office. I will contact the Executive Director of Big Brothers, Mr. Clay Brewer; the southside area caseworker, Mr. Jim Morris; or myself for more information.

Sincerely,

Don Wilkins

Don’t read this

by Tim Davis

To most people, Homecoming means a football game, lots of people you’ve never seen before wearing nametags that say “CLASS OF ’82”, and those same people saying things like, “When did they build that, Mabel? Hell, that used to be a gravel pit.”

You know that’s going to happen, but there are a few events scheduled during Homecoming week that you might not know about. If you read the next paragraph you’ll find out what they are.

The above-mentioned Homecoming activities will give students a welcome break from the monotones of every-day school life, such as chewing food, so get involved and have a good time.

Yes, one last little thing. In case you lose your calendar and you don’t know how soon Homecoming will be here; just wait until you see a guy wearing a sticker that says, “Hi, My name is Hal,” and you’ll know.

**Physical therapy program launched**

Indiana Central University's physical therapy program is under way this year. It is under the direction of Mr. Terry Malone who received his bachelor's degree at Bluffton College. His master's and doctoral work was at Duke University. Other members of the faculty are Mary Jane Archer, who received her bachelor's of physical therapy degree at the University of Missouri and her master's degree at the University of Southern Illinois, and Mr. Samuel Kegerreis, who received his bachelor's degree at Indiana University of Pennsylvania. His physical therapy degree at the University of Pennsylvania and his master's degree at West Virginia University.

The first class has an enrollment of 18 but this will eventually be increased to an enrollment of 20 students each year.

These students will complete five semesters and two summer sessions before receiving their master of science degrees. This will include 30 weeks of clinical training in hospitals around the Indianapolis area.

To be considered for the program, students must have completed at least 90 semester hours including certain prerequisites. Those students attending Indiana Central University who enter the program after their junior year will receive a bachelor's degree after completing the first two semesters of the physical therapy program.

The physical therapist's main duty is to restore or improve the function of body parts after disease or injury. Therapists will be working in a variety of settings. They can work at colleges and universities as athletic trainers, helping to treat and prevent injuries in contact sports. They can also work to design special programs for students with physical handicaps.

Many other physical therapists work in hospitals. They work with the doctors in treating amputees, stroke victims of muscular dystrophy, burn victims and others.

There are many other opportunities available to physical therapists. These include going into private practice, working for industrial firms or going into research for newer and better treatment techniques.

**WEATHERFAX**

October one of sunniest months

October brings Brown County Day and falling leaves with their many colors. October also brings good football weather as the average temperature in Indianapolis lowers to 56. The normal daily maximum temperature is 65, and the minimum is 44; however, in 1954 one day recorded a high of 90, and in 1942 a low of 17 was observed.

Rainfall averages 2.5 inches, but in 1941 a wet October experienced 8.4 inches, and in 1944 Indianapolis dried out with only 0.6 of an inch. October usually brings only a trace of snow or sleet, and winds average 10 mph from the southwest. In 1932 an October day gave Indianapolis a wind of 56 mph from the northwest for a short period during the day.

There are usually 12 clear days which give our city some of October's "bright blue weather" and these make October one of the sunniest months. Eight days are partly cloudy and 11 days are cloudy during a normal month with measurable precipitation falling on 7 days. Two days usually have more than a trace of precipitation. One day has heavy fog, and temperatures dip below freezing on 3 days—usually toward the end of the month. Even so, October usually is a beautiful month here in Hoosierland!

If you want to learn more about the weather and climate, Meteorology will be offered next semester with classes starting in January. Also, a class in Historical Geology will probe the geologic history of our planet with emphasis on Indiana and indicate climatic conditions of the geologic past. However, if you want to lean about the climate in faraway places and if you enjoy people and foreign lands, Human Geography is for you. Now is the time to sign up for one of these courses and learn more about the world in which you live, as well as meet liberal arts science requirement!

Earth Sciences

**High School Day is sneak preview**

High school students will have a sneak preview of university life on Saturday, October 18, at Indiana Central University's High School Day. Students, faculty, and administrators will fill in details of academic and campus life, and the Indiana Central Greyhound football team will give a lesson on team spirit in a tangle with Georgetown.

Visiting students and parents begin the day with registration at 8:15 a.m. in Schwitzer Center Lobby. Campus tours, conducted by the Presidential Aides of Indiana Central, will be given concurrently with registration. An Information Fair will be held on the concourse of Schwitzer Center, providing knowledge on the Honors Program, international studies, financial aid, admissions, and academic departments.

An official program kicks off at 10 a.m. in Ransburg Auditorium. "ICU As Seen By The Student" will be topic of discussion by a student panel. Following the panel presentation will be the Indiana Central Stage Band under the direction of James Edison along with the Indiana Central Concert Choir and Central Singers under the directorship of Paul Kransky.

Visitors will enjoy lunch courtesy of the University, in the campus cafeteria before viewing Indiana Central versus Georgetown in a football game at 1:30 p.m. in Key Stadium.

**Related Arts class travels to Chicago**

Dr. Gerald Boyce and Mr. James Lamberson are conducting a field trip to Chicago October 9 and 10. With approximately forty students in tow, they plan to visit the Chicago Arts Institute and the Chicago Symphony.

The related arts class includes mainly elementary education, music, and art majors. Combining music and art, the instructors aid the students in awareness and appreciation of art. The excursion is to cultivate interest in the arts and to widen the students' horizons.

**MUSIC RECITALS**

Sunday, October 19

**RECIrTALS**—Marc-Pulfer, Switzerland, organ, 4 p.m., Ransburg Auditorium, co-sponsored by the Indianapolis Chapter of the American Guild of Organists.

**Traditional Brown County Day tomorrow**

By Ann Laramore

The best day of the ICU year, Brown County Day, is Wednesday, October 8. According to Steve Schwab, Central Council President, it is a day for lots of fun and frolicability, staff and students go to get away from classes and offices and relax for the day. The cafeteria staff will provide beef barbecued in a special sauce, and the corn on the cob is a favorite. Caramel apples for all the hearty appetites. There will be games for everyone, such as frisbee and football, but the biggest event is the tug-of-war among all the classes, with the winning class challenging the faculty. The ski club is taking tents to Brown County Tuesday night, and anyone who would like to go with them is welcome.
